

Worksheet 10

Student Name: RAVI
Branch: CSE
Semester: 5th
Subject Name: ADBMS

UID: 23BCS10340
Section/Group: KRG 3-A
Date of Performance: 30/10/2025
Subject Code: 23CSP-333

1. Aim: Perform CRUD Operations using No-SQL Database: MongoDB

2. Objective:

- Create and manage databases and collections.
- Perform **CRUD operations** — Create, Read, Update, and Delete documents.
- Use **aggregation** for grouping and summarizing data.
- Understand how to modify, query, and manage collections efficiently in MongoDB.
- Gain practical experience with real-world data handling through command-line operations.

3. Code:

```
// 1. Show all databases

show dbs

// 2. Create or switch to your database

use db_shivanshu

// 3. Check current database

db

// 4. Create a collection (optional)

db.createCollection("movies")

// 5. Insert Operations

db.movies.insertOne({

  title: "Inception",

  director: "Christopher Nolan",

  year: 2010,

  rating: 8.8,
```

```
genre: "Sci-Fi",  
features: ["Mind-bending", "Action"],  
added_by: "RAVI"  
})
```

```
db.movies.insertMany([  
  
  {  
  
    title: "Interstellar",  
    director: "Christopher Nolan",  
    year: 2014,  
    rating: 8.6,  
    genre: "Sci-Fi",  
    features: ["Space", "Drama"],  
    added_by: "Shivanshu"
```

```
  },
```

```
  {
```

```
    title: "Avatar",  
    director: "James Cameron",  
    year: 2009,  
    rating: 7.8,  
    genre: "Adventure",  
    features: ["3D", "Action"],  
    added_by: "Shivanshu"
```

```
  },
```

```
  {
```

```
    title: "The Dark Knight",
```

```
director: "Christopher Nolan",
year: 2008,
rating: 9.0,
genre: "Action",
features: ["Batman", "Crime"],
added_by: "Shivanshu"
}
])

// 6. Show all collections
show collections

// 7. Read Operations
db.movies.find().pretty()
db.movies.findOne()
db.movies.find({}, { title: 1, year: 1, _id: 0 })
db.movies.find({ genre: "Action" })
db.movies.find({ "details.language": "English" })

// 8. Update Operations
db.movies.updateOne(
  { title: "Avatar" },
  { $set: { rating: 8.1, genre: "Sci-Fi Adventure" } }
)
db.movies.updateOne(
  { title: "Inception" },
  { $push: { features: "Thriller" } }
)
```

```
db.movies.updateOne(  
  { title: "Inception" },  
  { $pull: { features: "Action" } }  
)
```

```
db.movies.updateMany(  
  { director: "Christopher Nolan" },  
  { $set: { language: "English" } }  
)
```

```
db.movies.updateMany({}, { $unset: { added_by: "" } })
```

```
db.movies.updateMany({}, { $set: { color: "Full HD" } })
```

```
db.movies.updateOne(  
  { title: "Tenet" },  
  { $set: { director: "Christopher Nolan", year: 2020, rating: 7.5 } },  
  { upsert: true }  
)
```

// 9. Delete Operations

```
db.movies.deleteOne({ title: "Avatar" })
```

```
db.movies.deleteMany({ director: "Christopher Nolan" })
```

```
db.movies.deleteMany({})
```

// 10. Grouping (Aggregation)

```
db.movies.aggregate([  
  { $group: { _id: "$director", total_movies: { $sum: 1 } } }  
)
```

```
db.movies.aggregate([
```

```
{ $group: { _id: "$genre", total_movies: { $sum: 1 } } }
```

```
)
```

```
// 11. Drop collection
```

```
db.movies.drop()
```

```
// 12. Drop database
```

```
db.dropDatabase()
```

4. Output:

```
[shivanshuranjansingh@Shivanshu-MacBook ~ % mongosh

5. Learning Outcomes:

- Understand the structure and working of MongoDB as a NoSQL database.
- Create and manage databases and collections using MongoDB commands.
- Perform CRUD (Create, Read, Update, Delete) operations on documents.
- Apply aggregation operations for data grouping and analysis.
- Gain practical skills in handling and modifying data using MongoDB shell.
